We have a passion for healthy sitting.

Ask your qualified specialist dealer which manufacturer is an authority in **healthy sitting**, and you're sure to hear the name **MOIZI**. And not without reason:

Since 1994, we have been manufacturing chairs that promote your health. Taking our inspiration from designer Peter MOIZI's original ideas, we have dedicated ourselves to dynamic seating and have gained a high level of expertise in this field. Our innovative ideas are centred on incorporating movement and dynamics into sitting, an otherwise very static, immobile posture.

Our designers skilfully combine optimal ergonomics and contemporary, attractive design. MOIZI chairs are suitable for almost every aspect of daily life.

Here at our location in Brakel in the Weser Uplands of Germany's Westphalia region, we plan, design and manufacture our chairs to the highest standards of quality. We use moulded beechwood from local sustainable sources, and we also pay particular attention to environmental compatibility when it comes to upholstery foam, textiles and leather.

We believe that chairs should be designed in such a way as to enable **movement while sitting** which, in turn, promotes comfort and health – and we put all our experience and expertise into creating precisely that. The flexibility of MOIZI chairs, effected by various light body movements, supports natural sitting motions.

The result – an extraordinarily relaxed, comfortable sitting experience. You won't want to sit on any other chair again.

Stay in motion, stay healthy! Then we've done our job well.

Healthy sitting is dynamic sitting: The MOIZI motion

Active sitting position

- Relief of pressure on the spine and the internal organs
- Improved breathing

Our bodies are not made for sitting. Nature designed our bodies with movement in mind, and yet we spend up to 85% of our waking hours sitting! We all know the result – back problems are among the most common ailments.

We really can't avoid sitting whilst studying, working or during our free time. What we can do, however, is change the way we sit.

And we can tell you how!

Sitting still? Movement is natural!

Your body knows what's good for it. We see that in our children every day. However, when we tell them to sit still or when we scold them for tipping their chair, we are, in fact, teaching them to sit wrongly because there's nothing better we can do for our backs when sitting than staying in motion.

Active, dynamic sitting involves frequently altering our sitting position, thus encouraging the mobilisation of the musculoskeletal system. Even the subtlest changes of posture help, such as a shift of weight, a tensing of muscles, even breathing. The alternation between tensing and relaxing trains the back muscles and stimulates circulation. Due to the constant movement, the intervertebral discs are supplied with the necessary nutrients. Your breathing deepens, you relax and you can concentrate much longer on whatever you're doing.

Passive sitting position

- Relaxed reclining position
- The spine is supported

Back and forth – keep moving.

If you work a lot at a desk, then a frequent change of sitting position is particularly recommended. Our chairs promote precisely that. **In the active sitting position**, the seat is tipped forward. This results in an automatic straightening up of the upper body and the pelvis tips slightly forward. This creates an open angle between your torso and thighs which, in turn, relieves pressure on the spine and internal organs and improves breathing.

In order to change to the **passive sitting position**, all you have to do is relaxedly lean back. Your MOIZI chair has an ergonomically shaped backrest with an integrated lumbar support which helps retain the natural 'S' shape of the spine.

Incidentally, the 'S' shape of the spine doesn't develop in children until around the age of 12. Chairs with lumbar supports are, therefore, not suitable for children under the age of 12. For this reason, our chairs for children and teenagers have a straight backrest.

Furniture for children
and teenagers

My place!

MOIZI 6 | 7 | 10 | 17

No more scoldings for tipping your chair with the MOIZI 6! Not only is tipping it fun, it ensures an ergonomically correct sitting position with a straight spine, and it trains your muscles at the same time. The softly shaped runners facilitate relaxing rocking movements, and built-in absorbers allow for gentle sideways motions. A cushioning system protects the spine when sitting down. The depth and height of the seat are multi-adjustable, as is the height of the backrest.

Easily adjustable to a height of between 53 and 83 cm, the MOIZI 17 desk rises to every occasion. The desktop can be positioned at various angles and the retractable raised lip ensures that nothing slips off the desk, even when it's tilted. The desk has plenty of additional storage space and, with an extra module, this children's desk can be transformed into a PC workstation.

This desk and chair grow with your child and his or her needs, and is sure to become a favourite piece of furniture.

everything well organised

Functions

Stay loose

MOIZI 4

As active and dynamic as the person who sits on it. The MOIZI 4 rocker chair – for a feeling of real freedom. The runners are tip-resistant and the armrests are set well back so that you have freedom of movement as you work. The rhythmic rocking motion causes the back muscles to alternately tense and relax which, in turn, exercises and relieves strain on the spine. A built-in lumbar support offers additional stability. Forget tension – relaxation is the order of the day!

And teenage growth spurts? – No problem for the MOIZI 4. The seat and backrest have independent multiple height settings.

The best of friends

MOIZI 11 | 12 | 19

Quincy has a lovely spotted coat and he never sits still. He moves forward, sits up, turns to the left or the right, leans back relaxedly or has a good stretch.

His owner has lots of fun toys and she does just the same. No wonder the two of them get along so well and are both so fit and full of energy.

Depending on your sitting position, the body experiences varying states of stress and relaxation. The MOIZI 11 encourages this healthy interplay of tension and relaxation which, in turn, relieves strain on the back and prevents stiffness. The typical swinging movement of the seat and backrest can be individually adjusted to suit the user's height and weight, as can the various height settings.

That keeps you moving – and keeps you healthy.

MOIZI 22 | 23 | 24

Lengthy, sophisticated dinner parties or long, tedious meetings – you'll actually enjoy sitting for hours on these timelessly elegant cantilever chairs. But you won't be sitting alone for long. The MOIZI 24 is the perfect complement to contemporary dining and conference tables. A subtle movement of the body is enough to effect a smooth transition from one sitting position to another. The seat-depth suspension provides a 'soft landing' when sitting down. A subtle lateral movement of the seat enhances comfort even further.

The contoured, angled front runners aid the transition from an active sitting position in which the upper body is tilted forward, to a relaxed sitting position in which the body gently rocks as it reclines.

A unique combination of elegant design, ergonomic benefit and supreme comfort.

Functions

Looks good, feels good

MOIZI 29

We don't know what kind of clothes you'll be wearing, but, with the MOIZI 29, we guarantee you'll stay looking good and feeling good, even if the meeting goes on longer than planned.

The swinging movement of both the seat and backrest promote concentration and keep your mind alert. Even during intense discussions and talks, your attention remains focused over a longer period of time than if you were sitting on a conventional chair.

An added plus is the wide range of design variations. Chair frames and armrests are available with powder coating and shiny chrome-plated finish. We offer the choice of different leathers, textiles and colours leaves nothing to be desired.

MOIZI 40

The place where your entire family loves spending time: a wonderful dining room with elegant Moizi 40 chairs. No one will be able to resist spending time here. All the better, then, that they can sit comfortably and flexibly on these chairs. The Moizi 40 enables finely balanced sitting movements.

The unique feel of these chairs is the result of a patented technology especially developed by Moizi. The seat shell appears to float above the finely curved chair legs. The Moizi 40 is offered in three different heights, making it suitable for people of all heights.

This modern chair will suit any dining or living room perfectly. Leather and material upholstery in cheerful colours are teamed with fine woods, giving rise to a range of elegant and individual combinations.

It's as if it were tailor-made for your home: a favourite space for your favourite people.

Functions

Lively elegance.
Sophisticated enjoyment.

Available as a cantilever chair or with four legs: Moizi chairs appeal because of their elegance – whether when eating with friends or playing games in the evening.

Pure relaxation

MOIZI 9 | 31

Experience the luxury of pure, unadulterated relaxation. You can adjust your MOIZI 31 to your own favourite position at the touch of a button. The headrest relieves pressure from your cervical spine and the footrest can be altered to various positions. Simply adjust both to the position most comfortable for you.

You can adjust and lock your reclining position by means of a cordless electric motor. A comfortable midway position is ideal for reading. The reclining setting enables you to tilt back to the relaxing 'heart-balance position' in which your feet are higher than your heart. An immediate sense of harmonic relief and relaxation are the result. And the tilting action makes getting out of the chair considerably easier.

The perfect chair to while away pleasant hours in complete comfort.

It's swingtime!

MOIZI 13 | 14

It won't just be the baton that'll be swinging – you'll be swinging too! The swinging seat and backrest of your MOIZI 14 follow you every movement, which is not only incredibly relaxing, but also stimulates your muscles. You can, if you prefer, lock the chair's position with a fixation lever.

Whichever you choose, the ergonomically shaped seat ensures an optimum sitting angle. The chair retains and supports the natural shape of the spine, transforming your own private swing session into an active, stimulating experience for body and soul.

Office partner

MOIZI 18

Sitting at a desk for hours at a time is the main cause of back tension. The MOIZI 18, therefore, comes as a real blessing for all desk-bound workers. There's simply nothing better you can do to keep your back healthy and your mind alert at work.

The seat and backrest of the pivotable motion chair have an individually adjustable swing movement. This means that the chair follows the body's natural need for movement and promotes dynamic sitting. The continual change of posture strengthens the muscles of the abdomen and back, stimulates circulation, improves breathing and gives rise to welcome moments of relaxation.

The height is fully adjustable by means of a pneumatic spring; the backrest can also be adjusted to various heights and the swing movement can be set at different levels.

MOIZI 18

Motion chair, optional armrests, high backrest and wood-clad star base

Functions

Well-deserved top marks

MOIZI 21

Still relaxed and wide awake at the end of a long day correcting 30 maths tests? Top marks go to the MOIZI 21. With its spring and buffer mechanism, it encourages its user to frequently and intuitively change sitting position which, in turn, has a positive effect on the muscles, spine and intervertebral discs. The continual, body-synchronous sequence of movements promotes concentration – a great benefit, not only when you have a pile of correcting to do!

The ergonomically shaped backrest cushion is fully height adjustable. The seat height can be altered by means of a pneumatic spring. The height of the armrests can be varied using a push-button, and the distance between the armrests can also be modified.

In this comfortable working chair you'll immediately feel as though you're in good hands.

MOIZI 33 | 34 | 35 | 36

Looks good and has what it takes. With its clear-cut, contemporary design, the MOIZI 33 is ideally suited to a modern environment. And not only that – the ergonomically constructed chair is also equipped with a special 3D-motion mechanism. That means that your body is continually moving – similar to on a sitting ball. This movement can be adjusted to suit the user's individual needs. Furthermore, the chair has a 360° swivel action bringing invaluable movement into your daily office life!

The upholstery makes it particularly comfortable, as does the fully adjustable height mechanism which is controlled by means of pneumatic springs set at two different levels.

This chair will have you focused and bursting with creativity, even on the most chaotic days.

Functions

Standing room only

MOIZI 16 | 20 | 25 | 28

The MOIZI 16 and its companions the MOIZI 20 and 28 will stand by you through thick and thin. Standing supports are perfect for those people with physically demanding occupations. They offer support in jobs that involve alternate sitting and standing and help to revive body and mind. Their flexible construction means that they promote a natural sitting position. They don't take up much space, offer plenty of room for movement and they encourage a dynamic, back-friendly sitting position. The slip-resistant base plate facilitates an open sitting angle as well as continual movement in all directions.

The MOIZI 25 standing desk is the perfect addition. The worktop can be tilted both vertically and horizontally and the desk incorporates a surface area large enough and stable enough to accommodate a computer screen. There is also a comfortable footrest.

Equipped with pneumatic springs, MOIZI standing supports and the standing desk are fully adjustable to any height.

Materials

Wood

All MOIZI furniture is made of beech wood. Beech trees, from local, ecologically sustainable forests near our plant here in the beautiful Weser Uplands, provide us with our raw material.

MOIZI furniture is available with a transparent varnish or oiled and waxed. Most of our models are available in a variety of wood stains, and some are available with real wood veneer finishes.

Our wood suppliers are PEFC-certified. Protecting our forests means we are actively protecting our environment: PEFC works towards preserving our forests and maintaining their ecological balance. Companies that are PEFC-certified are committed to preserving the environment and interacting responsibly with the essential raw material that is wood.

More information about sustainable and environmentally-friendly forestry is available at www.pefc.de

Textiles and leather

- Synthetic fibre – flame-resistant material
- Pure wool – high sunlight and abrasion resistance
- Fulled fabric – homely, felt-like appearance
- Microfibre – highly abrasion resistant and easy to clean
- Semi-aniline leather – solid-coloured leather, surface pigment coating
- Aniline leather – high-quality solid-coloured leather with no surface pigment coating

Warranty

We offer the following warranty on all products if used as intended:

- two-year full guarantee
- five-year spare-parts guarantee on wood and metal components
